

Bingham County Weed Control has the opportunity to help the private landowner this year in the fight against noxious weeds.

Funding has been granted by the Idaho Department of Agriculture to the County in the form of a cost-share chemical help program.

The cost-share allows us to match up to half the price of your chemical purchase up to a total of \$150.00.

If you are interested in this program,

1. Print the two forms:
 - a. One is the Cost Share record form
 - b. The other is a In-Kind form that we send back to the state.
2. Purchase your chemical from a retail store or fertilizer company.
3. After spraying the noxious weeds on your non-crop lands,
 - a. Make a copy of the sales receipt
 - b. Fill out forms provided
 - c. Return these to: Bingham County Weed Department
